Thanks so much. My gmail account should be able to handle the large documents: clean.soil2013@gmail.com.
I'll wait and petition you for the FS in 6-8 weeks.
Thanks again, M.

Mr. Slatten,

Your FOIA request dated April 17, 2013, for the RI documents for the Vineland Chemical Superfund Site was received by EPA.

I should be able to email the PDFs of these documents, however, please let me know if you have any limits on the size of attachments your email server can accept. (And this will probably require the documents being sent in three separate emails). I will wait for your reply before emailing you with the documents. Otherwise I can send you a CD.

There is an FS document that is currently not scanned and is only available in paper form at the moment. You are welcome to make an appointment with the Superfund Records Center in order to view the document—please let me know if you would like to do so and I can send you their office phone number. I should be able to get the document scanned in the next month or two, depending on the schedule of those at the records center. If you can receive large PDFs, please email me in about 6-8 weeks and I can email you the FS document. If you will require CD, I can also wait so that I can send all of the documents at once.

Please let me know how you would like to proceed with regards to sending you the documents.

Thank you,

Nica Klaber
